2. Summary of Material Accounting Policy Information

Basis of Preparation and Statement of Compliance

The unaudited condensed interim consolidated financial statements of the Group have been prepared on the historical cost basis of accounting, except for lease liabilities and retirement liability which are measured at present value, and are presented in Philippine Peso, the Group's functional and presentation currency. All values represent absolute amounts except when otherwise stated.

The unaudited condensed interim consolidated financial statements do not include all the information and disclosures required in the annual consolidated financial statements and should be read in conjunction with the Group's annual consolidated financial statements as at December 31, 2023.

The unaudited condensed interim consolidated financial statements of the Group for the nine months ended September 30, 2024 have been prepared in accordance with PAS 34, *Interim Financial Reporting* and in compliance with Philippine Financial Reporting Standards (PFRS). This financial reporting framework includes PFRS, Philippine Accounting Standards (PAS) and Philippine Interpretation from International Financial Reporting Interpretations Committee (IFRIC) issued by the Philippine Financial and Sustainability Reporting Standards Council (formerly Financial Reporting Standards Council) and adopted by the SEC, including SEC pronouncements.

Adoption of Amendments to PFRS

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of the following amendments to PFRS effective for annual periods beginning and after January 1, 2024:

- Amendments to PFRS 16, Leases - Lease Liability in a Sale and Leaseback - The amendments clarify that the liability that arises from a sale and leaseback transaction, that satisfies the requirements in PFRS 15, Revenue from Contracts with Customers, to be accounted for as a sale, is a lease liability to which PFRS 16 applies and give rise to a right-of-use asset. For the subsequent measurement, the seller-lessee shall determine 'lease payments' or 'revised lease payments' in a way that the seller-lessee would not recognize any amount of the gain or loss that relates to the right of use retained by the seller-lessee. Applying this subsequent measurement does not prevent the seller-lessee from recognizing any gain or loss relating to the partial or full termination of a lease. Any gain or loss relating to the partial or full termination of the lease does not relate to the right of use retained but to the right of use terminated. The amendments must be applied retrospectively. Earlier application is permitted.
- Amendments to PAS 1, Noncurrent Liabilities with Covenants - The amendments clarified that covenants to be complied with after the reporting date do not affect the classification of debt as current or noncurrent at the reporting date. Instead, the amendments require the entity to disclose information about these covenants in the notes to the financial statements. The amendments must be applied retrospectively. Earlier application is permitted. If applied in earlier period, the Company shall also apply Amendments to PAS 1 - Classification of Liabilities as Current or Noncurrent for that period.
- Amendments to PAS 7, Statement of Cash Flows and PFRS 7, Financial Instrument: Disclosures - Supplier Finance Arrangements - The amendments introduced new disclosure requirements to enable users of the financial statements assess the effects of supplier finance arrangements on the liabilities, cash flows and exposure to liquidity risk. The amendments also provide transitional relief on certain aspects, particularly on the disclosures of comparative information. Earlier application is permitted.

The adoption of the amended PFRS did not materially affect the condensed interim consolidated financial statements of the Company. Additional disclosures were included in the condensed interim consolidated financial statements, as applicable.

New and Amendments to PFRS in Issue But Not Yet Effective or Adopted

Relevant new and amendments to PFRS, which are not yet effective as at September 30, 2024 and have not been applied in preparing the condensed interim consolidated financial statements, are summarized below.

Effective for annual periods beginning on or after January 1, 2025:

- Amendments to PAS 21, The Effects of Changes in Foreign Exchange Rates - Lack of Exchangeability - The amendments clarify when a currency is considered exchangeable into another currency and how an entity determines the exchange rate for currencies that lack exchangeability. The amendments also introduce new disclosure requirements to help users of financial statements assess the impact when a currency is not exchangeable. An entity does not apply the amendments retrospectively. Instead, an entity recognizes any effect of initially applying the amendments as an adjustment to the opening balance of retained earnings when the entity reports foreign currency transactions. When an entity uses a presentation currency other than its functional currency, it recognizes the cumulative amount of translation differences in equity. Earlier application is permitted.

Deferred effectivity -

- Amendments to PFRS 10, Consolidated Financial Statements, and PAS 28 - Sale or Contribution of Assets Between an Investor and its Associate or Joint Venture - The amendments address a conflicting provision under the two standards. It clarifies that a gain or loss shall be recognized fully when the transaction involves a business, and partially if it involves assets that do not constitute a business. The effective date of the amendments, initially set for annual periods beginning on or after January 1, 2016, was deferred indefinitely in December 2015 but earlier application is still permitted.

Under prevailing circumstances, the adoption of the foregoing amendments to PFRS is not expected to have material effect on the condensed interim consolidated financial statements of the Group. Additional disclosures will be included in the notes to the condensed interim consolidated financial statements, as applicable.

19. Operating Segment Information

For management purposes, the Group is organized into operating segments based on brand names. However, due to the similarity in the economic characteristics, such segments have been aggregated into a single operating segment for external reporting purposes.

Sales reflected in the consolidated statements of comprehensive income are all from external customers and within the Philippines, which is the Group's domicile and primary place of operations. Additionally, the Group's noncurrent assets are also primarily acquired, located and used within the Philippines. Sales are attributable to revenue from the general public, which are generated through the Company's store outlets. Consequently, the Group has no concentrations of revenue from a single customer in 2024 and 2023.

2.8 RISK

Overview

The Group's activities expose it to a variety of financial risks: market risk which includes credit risk, liquidity risk and interest rate risk. The Group's overall risk management program seeks to minimize potential adverse effects on the financial performance of the Group. The BOD reviews and approves the policies for managing each of these risks.

Credit Risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Group. Financial assets that potentially subject the Group to credit risk consist primarily of cash in banks, short-term investment, trade receivables and refundable lease deposits.

Risk Management. To manage credit risk, the Group deals only with reputable banks and creditworthy third parties. Sales to retail customers are required to be settled in cash or through major credit cards, further mitigating credit risk. There are no significant concentrations of credit risk, whether through exposure to individual customers and/or specific industry sectors.

The table below shows the gross maximum exposure of the Group to credit risk:

	September 30, 2024 (Unaudited)	December 31, 2023 (Audited)
Cash in banks and cash equivalents	₱1,319,944,880	₱1,358,508,038
Trade receivables	135,289,376	134,936,141
Accrued interest receivable	2,074,167	9,258,082
	₱1,457,308,423	₱1,502,702,261

As at September 30, 2024 and December 31, 2023, the amount of cash in banks, cash equivalents, trade receivables and accrued interest receivable are neither past due nor impaired and were classified as "*High Grade*". High grade financial assets are those accounts with counterparties who are not expected by the Group to default in settling its obligations, thus credit risk exposure is minimal. This normally includes large prime financial institutions and companies. Credit quality was determined based on the credit standing of the counterparty.

Security. The Group does not hold collateral as security.

Impairment. Impairment analysis for trade receivables is performed at each reporting date using a provision matrix to measure ECL. The provision rates are based on days past due for the Group based on customer type and rating. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Generally, trade receivables are written-off if collection cannot be made despite exhausting all extra-judicial and legal means of collection.

There are no guarantees against trade receivables but these are due from credit card companies and creditworthy third parties, and are generally collectible within three (3) to thirty (30) days from transaction date. Historical information and present circumstances do not indicate any significant risk of impairment. Thus, management did not recognize allowance for ECL.

For other financial assets at amortized cost which mainly comprise of cash in banks, cash equivalents and accrued interest receivable, the Group applies the general approach in measuring ECL. Management assessed that the application of the general approach does not result to significant expected credit losses and thus, did not recognize allowance for ECL.

The Group assessed that the credit risk on the financial assets has not increased significantly since initial recognition because cash in banks, cash equivalents and accrued interest receivable are deposited with reputable counterparty banks, which exhibit good credit ratings.

The following table summarizes the impairment analysis of the Group's financial assets at amortized cost. It indicates whether the financial assets at amortized cost were subject to a 12-month ECL or lifetime ECL allowance and, in the latter case, whether they were credit-impaired.

Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The tables below detail the Group's remaining contractual maturity for its non-derivative financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay.

Interest Rate Risk

Interest rate risk is the risk that future cash flows from a financial instrument (cash flow interest rate risk) or its fair value (fair value interest rate risk) will fluctuate because of changes in market interest rates.

The Group's bank loans and trust receipts payable to local banks are subject to a repricing interest rate with and are exposed to fair value interest rate risk. The repricing of these instruments is done on a semiannual basis.

The Group regularly monitors interest rate movements and on the basis of current and projected economic and monetary data, decides on the best alternative to take. No sensitivity analysis is needed as future interest rate changes are not expected to significantly affect the Group's net income.

These bank loans and trust receipts are promissory notes under loan facilities which mature within 90 days to one year as at September 30, 2024 and December 31, 2023, and bear an effective interest rate ranging from 5.88% to 8.00% in 2024 and 4.88% to 9.25% in 2023.
